# Azure Integration Services

Integration is key

APIs   Workflows   Message   Events

Application integration is the backbone of digital transformation

By 2022, **65%** of large enterprises will have implemented a **hybrid integration** platform

Source: Gartner's How to Implement a Truly Hybrid Integration Platform, published February 2018

Messages
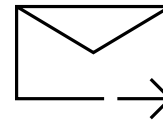

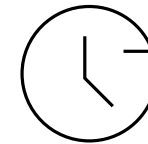

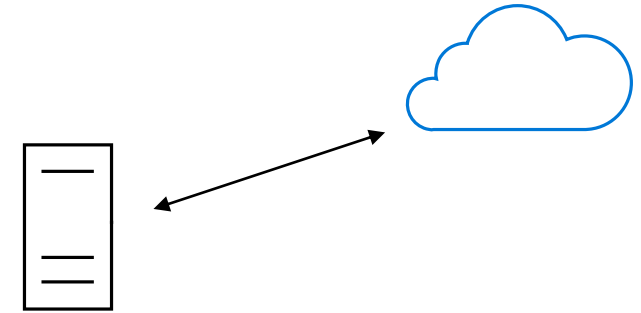

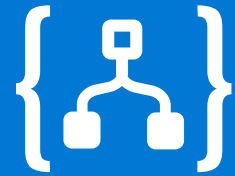

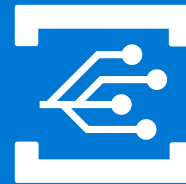

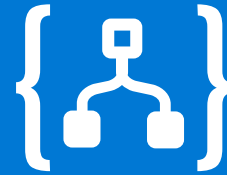

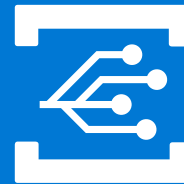

Events

API Management

Logic Apps

Service Bus

Event Grid

Azure Integration Services
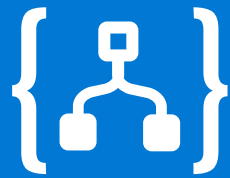

Azure API Management

Publish APIs safely and connect to backend systems hosted anywhere

- Work with any host, API, and scale
- Attract more developers
- Secure and optimize your APIs
- Gain insights into your APIs

Azure Logic Apps

Easily automate workflows and orchestrate business processes

- Out-of-the-box connectors reduce integration challenges
- Connect and integrate data from the cloud to on-premises
- B2B and enterprise messaging in the cloud
- Powerful web-based workflow designer
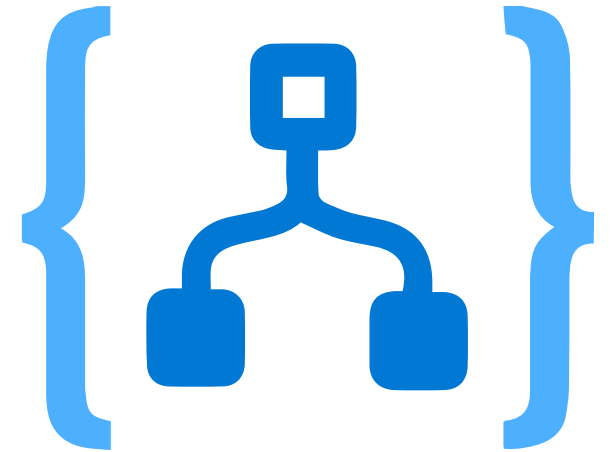

Azure Service Bus

Scalable and reliable cloud messaging as a service

- Simplify enterprise cloud messaging
- Build reliable, scalable cloud solutions
- Implement complex messaging routing

Azure Event Grid

Simplify event-based app development with a publish-subscribe model

- Simple HTTP-based event delivery
- Build better, more reliable applications through reactive programming
- Focus on product innovation
